Video Borescope

Models BR200 and BR250

Introduction

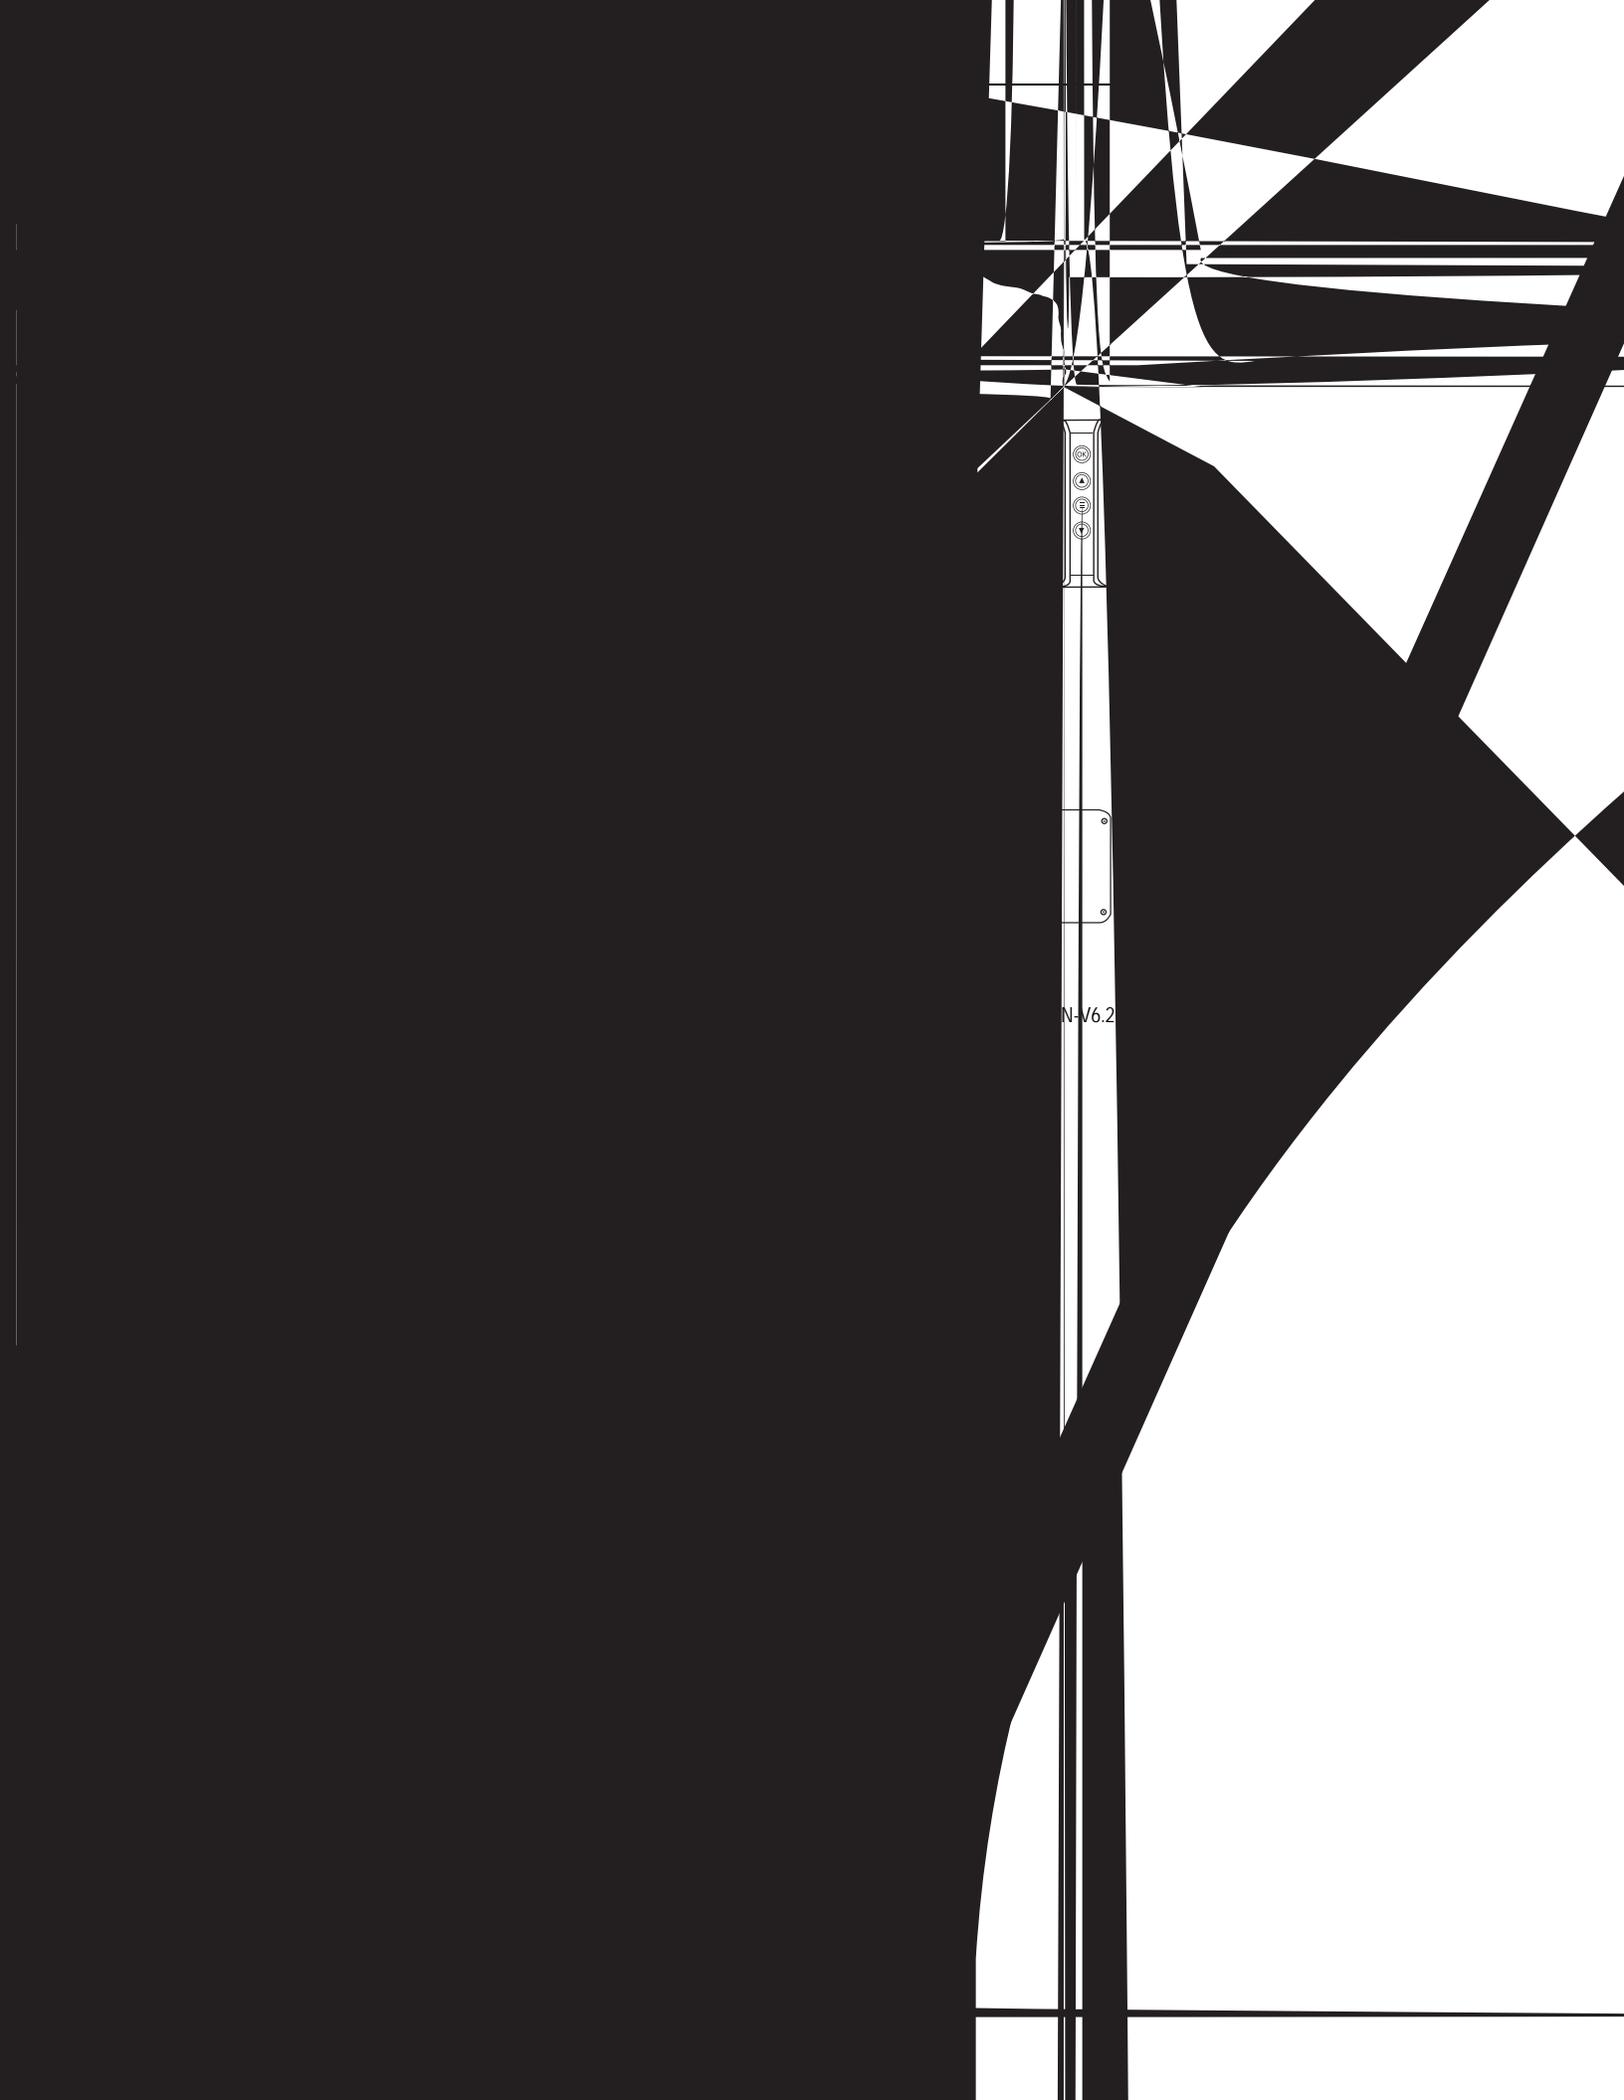

Congratulations on your purchase of this Extech BR200 (17mm camera head) or BR250 (9mm camera head) Video Borescope. This instrument was designed for use as a remote inspection device. It can be used to peer into tight spots and then supply real-time video and images that can be recorded. Typical applications include HVAC inspection, automotive inspection, cable routing, and automotive/boat/aircraft inspection. This meter is shipped fully tested and, with proper use, will provide years of reliable service.

Features

- 3.5 " TFT-LCD palm LCD monitor with high resolution
- The image head and the cable are water resistant when the unit is fully assembled (the monitor and the camera are not water resistant)
- Wireless and hard-wired functionality
- The monitor records video and images
- SD card capacity: 16G

Safety

- Do not expose instrument to moisture
- Shut off the instrument when not in use
- Remove the batteries when cleaning the instrument
- Replace all batteries at the same time

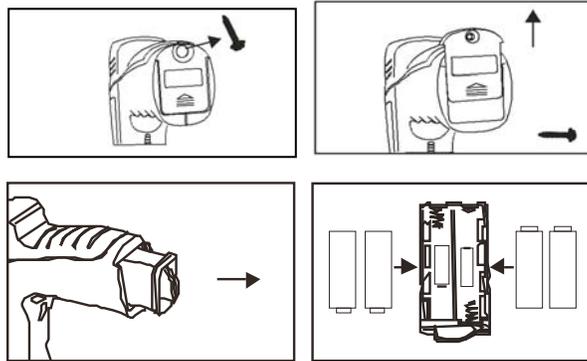

N-V6.2

This is a technical architectural drawing of a vertical shaft. The shaft is shown in a perspective view, extending from the bottom towards the top. At the top of the shaft, there is a cylindrical cap with four circular openings arranged in a square pattern. Below the cap, there is a rectangular bracket or support structure attached to the side of the shaft, featuring two small circular holes. The drawing is rendered in black lines on a white background. The shaft is partially obscured by a large, solid black shape that appears to be a structural element or a shadow. The background is white with some faint grid lines and other architectural details visible in the upper right corner.

Installation

Install the batteries into the instrument body, charge the monitor battery, connect the camera and flexible tube to the body, insert the micro SD card. Install any accessory as needed.

Battery Installation

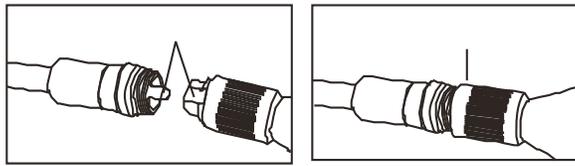

Connect Monitor Power

The monitor has a rechargeable battery. Plug in the AC adaptor and connect the cable to the *DC5V* socket on the monitor. The power indicator will light in red (or the battery capacity icon on LCD of monitor will blink, indicating that it is charging - and will turn off after a full charge)

Connect the camera and flexible tube

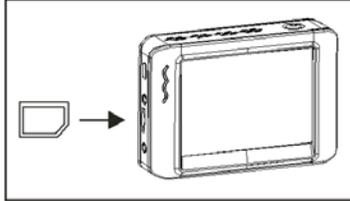

Connect the camera tube to the instrument body; ensure that the keyed ends are properly aligned. Once aligned, tighten the knurled knob to hold the connection firmly in place.

Warning. Permanent damage to the flex tube and loss of operation will occur if the flex tube is subjected to narrow radius or sharp angle bends.

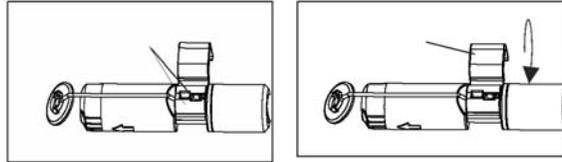

Inserting the micro SD card

Insert card with arrow pointing toward slot. Gently apply pressure until card locks into the spring loaded slot. To remove from unit, gently push the card inward and then release to eject it from the card slot.

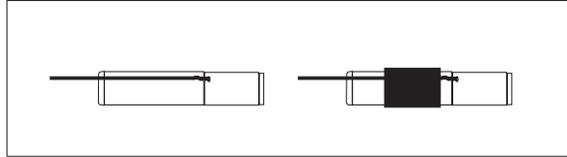

Installing the accessory tools BR200

The included accessories (mirror, hook and magnet) all attach to the camera in the same manner. Refer to the diagrams below:

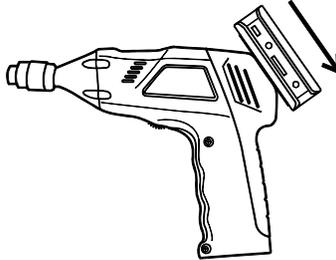

Installing the accessory tools BR250

Hook the attachment into the hole in the head and then slide the rubber sleeve over the attachment shaft

Attaching the Monitor to the instrument body

Connect the USB Cable

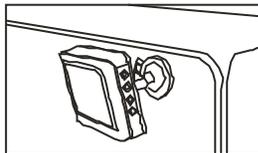

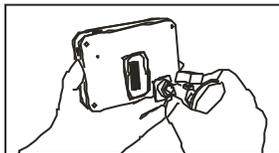

Use the USB cable to connect the monitor to a PC. The USB online icon will appear on the PC. Open **My Computer** on the PC, and locate the **Mobile Disk**. The **Mobile disk** can be used and accessed in the same manner as any external hard drive.

Video Output

Insert the video cable into the VIDEO OUT socket on the monitor. Insert the other end of the cable into the VIDEO IN jack of a TV or other monitor. The LCD Monitor will output a high quality video image.

Installing the Magnetic bracket

The magnetic bracket slides onto the rear of the monitor for convenient placement and viewing.

Operation

Basic Operation

1. Turn the ON/OFF dial switch to power the camera. The power indicator will switch on. The switch then acts as a dimmer for the two LEDs on the imager head of the camera.
2. Press and hold the monitor power switch for at least 2 seconds and the power indicator will illuminate green and a *Welcome* screen will appear.
3. Before attaching the monitor to the instrument body, press the down arrow button to select channel 4. The real time image will appear on the display LCD monitor.

Note. If the picture does not properly synchronize or has poor color, check that the Video System Settings are set to “NTSC”, not to ‘PAL” . This should fix the condition..

4. Use the up arrow to select video  or photo  mode.
5. Turn the ON/OFF dial to adjust the LED light intensity as desired.
6. The tube can be easily maneuvered into position. The tube can be bent into the shape of the area to be examined.
7. Use the supplied accessories to help retrieve small items.

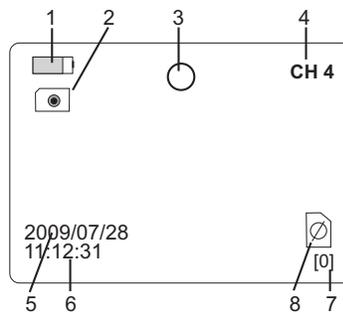

Taking a Picture

In Photo  mode, press OK to take a picture. The photo will automatically save to the SD card.

Recording a Video

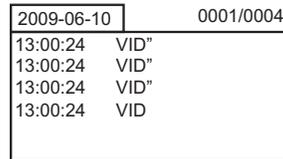

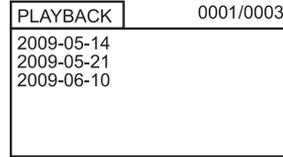

In Real-Time Monitoring (video) mode, press OK to begin recording; refer to the following diagram for display icon definitions:

1. Battery capacity
2. Function icon (video/photo)
3. Recording in progress
4. Channel
5. Date
6. Time Stamp
7. REC Time remaining
8. SD card

Viewing a Photo or Video

1. In the Real-Time Monitoring mode, press  to display a list of dated playback folders
2. Use the   keys to select the desired folder.
3. Press OK to open the selected folder and view a list of photo or video files.
4. Files are listed by time followed by (VID^o) for photos or (VID) for videos
5. Use the   keys to select a file.
6. Press OK to display the selected photo or video.
For video files:
Press OK to pause while playing.
Press again to resume.
 Fast Forwards the video
 Rewinds the video
Press  to stop video
7. Press  to return to menu.
8. Press  again to exit.

Note: Video automatically saves to file every 30 minutes. When the SD card is filled to capacity, the SD card icon changes to 'F'. No video will be recorded if the SD card is not inserted in the slot.

Delete a Single Video Or Photo

1. In the Real-Time Monitoring mode, press  to display a list of dated playback folders
2. Use the   keys to select the desired folder.
3. Press OK to open the selected folder and view a list of photo or video files.

| | |

| PLAYBACK | 0001/0003 |
| 2009-05-14 | |
| 2009-05-21 | |
| 2009-06-10 | |

4. Files are listed by time followed by (VID") for photos or (VID) for videos
5. Use the   keys to select a file.
6. Press and HOLD the  button, the display will show 'DELETE CURRENT FILE?'
7. Use the arrow keys to select **YES** or **NO**
8. Press OK to accept selection.
9. Press  twice to exit the Delete screen.

| | |
|------------|-----------|
| 2009-06-10 | 0001/0004 |
| 13:00:24 | VID" |
| 13:00:24 | VID" |
| 13:00:24 | VID" |
| 13:00:24 | VID |

Delete a File Folder

To delete a folder, use the same instructions for deleting a single video or photo. The only additional concern is that if a folder is not empty it cannot be deleted. Delete all of the files in a folder before deleting the folder. If the user attempts to delete a folder that is not empty, the following message will appear: FOLDER NOT EMPTY

Video Display on a PC

Several methods are available to playback or to copy video files on a PC. When connected, the files will become available as new drives on the PC.

1. SD card adaptor: Insert the mini SD card into the SD adaptor and then insert the adaptor into the PC SD slot (if available)
2. USB adaptor: Insert the mini SD card into a USB adaptor and plug into a USB port.

Restoring Factory Default Settings

1. In Settings Mode, use the arrow keys to select SYSTEM SETTING (green icon).
2. Press OK to call up the SYSTEM icon list
3. Use the arrow keys to highlight the DEFAULT icon (red)
4. Press OK and the DEFAULT selection screen will appear (YES, NO)
5. Use the arrow keys to highlight the desired response
6. Press OK to accept the selection and exit

View Version

1. In Settings Mode, use the arrow keys to select SYSTEM SETTING (green icon).
2. Press OK to call up the SYSTEM icon list
3. Use the arrow keys to highlight the VERSION icon (green)
4. Press OK to view the version
5. Press OK again to exit

Frame Rate Setting

1. In Settings Mode, use the arrow keys to select RECORDER SETTING (red icon).
2. Press OK to call up the RECORDER options
3. Use the arrow keys to highlight the FPS (frames per second) icon
4. Press OK to open the FPS parameter
5. Use the arrows to select the frame rate: 10, 15, 20, 25, or 30
6. Press OK to confirm

Time Stamp ON OFF Setting

1. In Settings Mode, use the arrow keys to select RECORDER SETTING (red icon).
2. Press OK to call up the RECORDER options
3. Use the arrow keys to highlight the Time Stamp icon (purple)
4. Press OK to open the parameter
5. Use the arrows to select ON or OFF
6. Press OK to confirm

Date/Time Setting

1. In Settings Mode, use the arrow keys to select DATE-TIME SETTING (yellow icon).
2. Press OK to call up Date and Time Settings window
3. Use OK to tab through the fields
4. Use the arrow keys to change a field setting
5. Press the  button to exit

Battery Replacement

You, as the end user, are legally bound (**EU Battery ordinance**) to return all used batteries, **disposal in the household garbage is prohibited!** You can hand over your used batteries / accumulators at collection points in your community or wherever batteries / accumulators are sold!

Disposal: Follow the valid legal stipulations in respect of the disposal of the device at the end of its lifecycle

Troubleshooting:

Power Reset for the LCD Unit

In the event of a power failure in the BR200/250 LCD display unit, follow the steps below to perform a power reset:

1. Un-dock the LCD module from the BR200/250 pistol-grip base unit.
2. Connect the AC adapter to the LCD module and the appropriate AC power source.
3. Locate the Reset port on the reverse side of the LCD module (labeled *Reset*).
4. Momentarily press the Power Reset button for at least 2 seconds and then release.
5. Leaving the AC adapter connected to the LCD module, power the unit on.
6. If the unit powers on, allow it to fully re-charge (up to 2 hours) before removing the AC adapter. If the LCD unit does not power on, repeat steps 1 through 6.

Specifications

CAMERA

| | |
|------------------------------|--|
| Imaging Sensor | CMOS |
| Total Pixels (NTSC) | BR200: 712 x 486; BR250: 640 x 480 |
| Horizontal View Angle | BR200: 50 degrees BR250: 45 degrees |
| Transmission Frequency | 2468MHz |
| Focus point | BR200: 20cm (8"), BR250: 15cm (6") |
| Minimum Illumination | 0 Lux |
| Modulation Type | FM |
| Bandwidth | 18MHz |
| Power Supply | 4 x AA batteries |
| Unobstructed Effective Range | 10m |
| Waterproof Capacity | IP67 (imager head only) |
| Dimensions (W D H) | 186 x 145 x 41(mm) (Exclude Flexible Tube) |

| | |
|-----------------------|---|
| Weight (approx) | BR200: 530g BR250: 450g |
| Camera head Diameter | BR200: 17mm (0.67") BR250: 9mm (0.36") |
| Operating Temperature | -10°C~+50°C +14°F~+122°F |

MONITOR

| | |
|----------------------------|-----------------------------|
| LCD Screen Type | 3.5" TFT-LCD |
| Effective Pixels | 320 (R.G.B.) x 240 |
| Video System | PAL/NTSC |
| Transmission Frequency | 2414, 2432, 2450, 2468MHz |
| Exterior Supply Voltage | 5VDC |
| Consumption Current (Max.) | 500mA |
| Charge Time | 3 hours |
| Work Time | 2 hours |
| Video Output Level | 0.9-1.3VP-P@75Ω |
| Receiving Sensitivity | ≤-85dBm |
| Dimensions (W x D x H) | 100 x 70 x 25(mm) |
| Weight (Approx) | 140g |
| Operating Temperature | -10°C~+50°C +14°F~+122°F |
| Operating Humidity (Max.) | 15~85%RH |

FCC Information

This device complies with part 15 of the FCC rules.
BR200: FCC-ID TW5GB8802

Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation.
